Transferring an Ebook to Your Kindle Via USB Cable (Older Generation Kindles Without Wifi Capabilities)

-From a computer, visit "Manage your Content and Devices" on your Amazon account and locate the item you want to download under Content.

-Click the "Actions" button beside the title and select "Download and Transfer via USB"

-Select the Kindle device you will transfer the file to and click the "Download" button.

-You may be prompted to open or save the file. Choose "Save" and select a location that is easy to find again, such as the Desktop.

-Once the file has been saved, connect your Kindle to your computer using a USB cable.

-Your Kindle will appear in the same location as external USB drives usually appear.

- Open the Kindle drive (For Windows users, this is typically in the "Computer" or "My
Computer" menu. For Mac users, the drive will appear on the desktop.) You will see several folders inside, one of which will be named "Documents." This is the folder you will move the downloaded file into.

-Locate the downloaded file and copy it into the Documents folder. You can generally copy files by clicking and dragging the file to the folder.

-Safely eject your Kindle device from your computer and unplug the USB cable. Your content will appear on the Home Screen.
